Evan Morris

Automation Tester at Dayinsure

Greater Cheshire West and Chester Area

Summary

Software Automation Engineer with 7 years of experience designing and maintaining advanced test frameworks using C#, Python and JS/TS. Expertise includes test management, leveraging AI tools and developing automated tests to drive quality. Committed to continuously pursuing excellence in technical QA strategy and delivery.

Experience

Dayinsure

QA Automation Engineer

January 2026 - Present (5 months)

Tarporley

API, WebUI and Mobile (Android & iOS) automation.

Tech Stack

- Languages: C#, TypeScript
- Frameworks & Tools: WDIO, NUnit, Reqnroll, Appium, BrowserStack
- CI/CD: DevOps
- AI Tools: Codex, ChatGPT

ControlUp

Software Automation Engineer

November 2023 - December 2025 (2 years 2 months)

Automation Framework Development: Engineered and maintained cross-platform automation frameworks (C#, Python, JavaScript) to deliver end-to-end testing across complex frontend and backend systems.

AI/Tooling Optimization: Leveraged AI tools (Cursor, Gemini, & GitHub Copilot) to accelerate framework development, resulting in optimized code and enhanced efficiency for in-house quality tools.

CI/CD & Quality Leadership: Managed overall test strategy and integrated CI/CD pipelines (DevOps, Jenkins), resulting in great reduction in critical bugs.

Tech Stack

- Languages: C#, Python, JavaScript
- Frameworks & Tools: Selenium, Playwright, WDIO, NUnit, PyTest, Cucumber, Karate
- CI/CD: DevOps, Jenkins, Git
- Operating Systems: Windows, Linux (Ubuntu, IGEL), macOS
- AI Tools: Cursor, Gemini, GitHub Copilot

Avanite

4 years 7 months

Software QA Engineer

May 2019 - November 2023 (4 years 7 months)

Northwich, England, United Kingdom

End-to-End Quality Ownership: Served as the sole QA resource for a critical enterprise-level product, overseeing all manual, exploratory, and automated testing efforts to ensure high-quality releases.

Automation Framework Architecture: Designed and built a robust automation framework from the ground up using C# and Selenium, establishing the foundation for repeatable and efficient testing.

CI/CD Integration: Successfully integrated automated tests into CI/CD pipelines

Tech Stack

- Core: C#, NUnit, Selenium
- CI/CD: DevOps
- Operating Systems: Windows

Junior Developer

April 2021 - July 2022 (1 year 4 months)

Northwich, England, United Kingdom

(Completed concurrently with Software QA Engineer role)

Internal Application Development: Designed and built internal tools, including a in-house website for demonstrations and testing, utilizing C# and JavaScript (React) to streamline team operations.

Engineering Support: Actively contributed to the main engineering team by performing code reviews, resolving bugs, and supporting development cycles.

Foundational Skills: Applied formal training in development while maintaining core QA responsibilities, demonstrating rapid skill acquisition and versatility.

Tech Focus

- Languages: C#, JavaScript

George at Asda

Warehouse Operative

August 2014 - August 2019 (5 years 1 month)

Stoke-on-Trent, United Kingdom

Managed daily warehouse operations with a focus on accuracy, efficiency, and teamwork in a fast-paced environment.

Education

Edge Hill University

Bachelor of Science - BS, Biology, General · (2016 - 2019)

Code Nation

Master: Coding Course · (January 2021 - April 2021)

Newcastle-under-Lyme College

Biology, Physical Education, Psychology · (September 2014 - June 2016)
